

COMPLETE YOUR PERSONAL ON-LINE DATA QUALITY ASSESSMENT

For one reason or another you haven't yet booked an on-site data quality assessment. You may be convinced that your data is already as good as it can be or you may not really understand prevalence and the difference patients missing off your register will make to your annual practice income.

Whatever the reason, we are now offering you the chance to analyse your own data (register totals) from the privacy of your own practice! To access our on-line DQA toolkit, click on (or copy the link below into your browser):

<http://www.insightsol.co.uk/DQAToolRegistration.php>

Follow through the registration process, enter in your practice population and current disease register totals and hit the calculate button. If there are any figures that you are unsure about, or you want to follow-up with an on-site assessment, do not hesitate to contact us. On-site DQA's come with a full 100% money back guarantee if we do not find more than your initial investment - you cannot possibly lose out.

(See overleaf for more information)

Practice Name:

Population: England Wales Scotland Northern Ireland

Age Distribution: *16+ **17+ ***18+

EXAMPLE

Hi Paul Carnduff. Please complete each of the Disease register populations and click **CALCULATE** to obtain a practice analysis for Insight Solutions IT Services Ltd (M12345). This Demo Version has been created to allow you to see your practice prevalence figures for each register provided and against the 4 lowest disease prevalence registers the impact of not having patients included on the register.

You should be achieving **£139.60** per point based on your current population. If you check the ppp column this will tell you what you are **actually** achieving per point for that disease area.

From the 4 lowest disease prevalence areas identified, by adding 428 patients to these registers will earn your practice **£16920.36**. The total value's displayed at the bottom are across all registers. To obtain a full analysis please [Contact Us](#). A Brief report on the figures provided is available at the [bottom](#) of this page.

Domain		register	prev	nat prev	+/-	ppp	value	if add	worth	new prev	+/-
CHD	76	<input type="text" value="76"/>	1.21%	3.4%	▼	£50.26	£3819.76	137	£6789.84	3.39%	↔
Asthma:	45	<input type="text" value="180"/>	2.87%	5.9%	▼	£*,**	£*,**	*	£*,**	*,**%	↔
Cancer:	11	<input type="text" value="116"/>	1.85%	1.4%	▲	£*,**	£*,**	*	£*,**	*,**%	▲
COPD:	30	<input type="text" value="37"/>	0.59%	1.6%	▼	£51.65	£1549.50	63	£2596.50	1.59%	▼
***CKD:	38	<input type="text" value="7"/>	0.14%	4.3%	▼	£4.19	£159.22	202	£5145.58	4.3%	↔
Dementia:	26	<input type="text" value="15"/>	0.24%	0.5%	▼	£*,**	£*,**	*	£*,**	*,**%	▼
***Depression:	31	<input type="text" value="414"/>	8.51%	10.9%	▼	£*,**	£*,**	*	£*,**	*,**%	↔
Depression1:	6	<input type="text" value="299"/>	4.76%	7.6%	▼	£*,**	£*,**	*	£*,**	*,**%	↔
Depression Incidence:	31	<input type="text" value="42"/>	0.86%	0.7%	▲	N/A	N/A	*	N/A	*,**%	▼
Heart Failure:	29	<input type="text" value="18"/>	0.29%	0.7%	▼	£57.24	£1659.96	26	£2388.44	0.7%	↔

£ per point should be £139.60 - CKD is only £4.19 per point & CHD £50.26 - all due to low prevalence

EXAMPLE REPORT

The table displayed shows how much your practice would be expected to earn based on your current population of 6275 meaning you should be achieving a Pounds Per Point (PPP) of **£139.60**.

This demo version shows your current prevalence and indicates if you are above or below the national prevalence for England, and against this displays your 4 lowest prevalence areas and the value you would achieve. The 'if add' column shows how many patients you would need to achieve national average and therefore achieve your average ppp. As it stands now your practice would expect to achieve about **£54947.05** (for the registers provided and if full points achieved) and by increasing each register to the national average (or 20 if already above) you would expect to achieve about **£97454.75** (for the registers provided and if full points achieved) an increase of **£42507.70**.

Complete your practice on-line data quality assessment today and find out how your prevalence compares to the national average.

To book an on-site data quality assessment to have a full validation of your QoF disease registers, contact us on 01527 557407 - this service comes with a full 100% money back guarantee, if we do not find you more potential income than it costs you, you will get your money back!
